Piły tarczowe z zębami wykonanymi z węglików wolframu HM przeznaczone są między innymi do cięcia wzdłużnego i poprzecznego drewna litego, sklejki, paneli z drewna oraz materiałów drewnopochodnych. Specjalne otwory dylatacyjne w korpusie tarczy sprawiają, że temperatura powstała na wieńcu podczas pracy, odprowadzana jest w głąb

korpusu przez co tarcza jest bardziej odporna na odkształcenia i deformacje podczas pracy.
